

G3.5 + G4

GAS INSERT FIREPLACES + AUTOFIRE™

TWO DECADES
OF LEGENDARY HEAT.

valor
FIREPLACES

Why Choose

Feel the heat.

All our gas fireplaces radiate heat. Like feeling the sun on your skin. The best kind of heat there is.

Heater-rated

We're rated with space heaters so we put Radiant Heat Technology into every fire. You can feel it.

Works quietly.

We designed our gas fireplaces to move the heated air via natural convection at the rate of 110 cubic foot per minute—no need for a noisy blower.

Stainless Steel burner

Our precision stainless steel burners don't rust, and create an enhanced flame and ember glow that produces radiant heat.

Efficiency

Valor fireplaces are heater-rated. Our Radiant Zone Heating is up to 25% more efficient than central forced air systems.

valorfireplaces.com/why-valor

A Valor?

Improving heat

Our exclusive *Secondary Heat Exchanger* and our aerodynamic firebox naturally improve convective heat—without a fan.

Logs provide heat.

High definition, low mass fiber ceramic logs heat up and glow quickly. We harness the radiating heat from our logs, just like real logs.

Ceramic glass window

Valor's durable and robust ceramic window glass improves radiant performance by absorbing and distributing radiant heat.

Built to last.

Our aluminized steel fireboxes handle high temperatures, delivering efficient radiant warmth. Our baked-on powder-coated paint offers a better texture and a more durable finish.

No power?

No problem. All Valor gas fireplaces run on 4 AA batteries as the primary source of power—not as back-up power like other brands. And you'll save money on your electrical bill.

Safety

We put our fires through rigorous safety testing in our in-house CSA approved lab.

Outdoor-friendly.

All Valor gas fireplaces are rated for outdoors under a covered patio and use quality materials that exceed the requirements for outdoor use.

Design your own.

Visit the Valor Fireplace Design Center to design your very own Valor Fireplace today.

Logs

G3.5
BIRCH 700BLK
REFLECTIVE GLASS LINER 706RGL
VINTAGE IRON 4-SIDED FLOATING FRONT 713FFV

Old wood fireplaces are highly inefficient heaters. Replace yours with a gas insert for an air-sealed, energy efficient and easy-to-use source of home comfort.

We design all our expertly crafted logs as realistic-looking as possible, and engineer them to harness radiant heat from the flames and glowing embers. The G3.5 and G4 fire beds may have slight differences in appearance. To view them separately, go to valorfireplaces.com

Remote

Set the temperature for specific times of the day.

Child Proof your remote for safety and ease.

Set the timer to turn the fireplace off up to 9 hours ahead.

Program your fireplace to turn on and off when you want at the temperature you want.

Accurately knows the current temperature of your room.

This standard, interactive remote has up-to-the-moment information on the state of your fireplace, and lets you select, adjust or program your desired temperature—automatically adjusting the fire to maintain the room temperature.

You can even turn your pilot light on or off from the comfort of your sofa.
