LARGE 36" + 42" FIREPLACES

New V-Class burner
maximizes radiant heat.

valor[®]
FIREPLACES

Why Choose

Feel the heat.

All our gas fireplace radiate heat.
Like feeling the sun on your skin.
The best kind of heat there is.

Heater-rated

We're rated with space heaters so
we put Radiant Heat Technology
into every fire. You can feel it.

Works quietly.

We designed our gas fireplaces to move
the heated air via natural convection
at the rate of 120 cubic foot per
minute—no need for a noisy blower.

Stainless Steel burner

Our precision stainless steel burners don't
rust, and create an enhanced flame and
ember glow that produces radiant heat.

Efficiency

Valor fireplaces are heater-rated. Our
Radiant Zone Heating is up to 25% more
efficient than central forced air systems.

FIXED FRAME KIT 1130FFK

A Valor?

Improving heat

Our exclusive *Secondary Heat Exchanger* and our aerodynamic firebox naturally improve convective heat—without a fan.

Ceramic glass window

Valor's durable and robust ceramic glass window improves radiant performance by absorbing and distributing radiant heat.

No power?

No problem. All Valor gas fireplaces run on 4 AA batteries as the primary source of power—not as back-up power like other brands. And you'll save money on your electrical bill.

Outdoor-friendly.

All Valor gas fireplaces are rated for outdoors under a covered patio and use quality materials that exceed the requirements for outdoor use.

Logs provide heat.

High definition, low mass fiber ceramic logs heat up and glow quickly. We harness the radiating heat from our logs, just like real logs.

Built to last.

Our aluminized steel fireboxes handle high temperatures, delivering efficient radiant warmth. Our baked-on powder-coated paint offers a better texture and a more durable finish.

Safety

We put our fires through rigorous safety testing in our in-house CSA approved lab. We provide a screen with every fireplace to keep you and your loved ones safe.

Design your own.

Visit the Valor Fireplace Design Center to design your very own Valor Fireplace today.

HEATSHIFT 48" LDK1 + LDK2

HEATSHIFT™

KEEPS WALL COOLER

Pioneered by Valor, our unique HeatShift System naturally circulates up to 125 cubic feet of convective heat per minute through hidden ducts and back into the room—avoiding surface areas above the fireplace.

IMPROVES PERFORMANCE

Harnessing convective warmth, up to 60% of fireplace heat rises and flows through HeatShift and back into the room. The remaining heat radiates from the fireplace, keeping you warm.

NO ELECTRICITY REQUIRED

HeatShift circulates heat naturally using gravity and Valor product ingenuity—no need for a fan or electricity. No power—no problem.

DESIGN FLEXIBILITY

Run standard finishing materials right up to the fireplace surround, including drywall, wood, tile and stone.

Install mantels lower than usual at a one-to-one ratio of depth to height from the fireplace surround

CONSTRUCTION MADE EASY

Valor fully ducts HeatShift for clean, safe air quality, meeting North American building code standards.

HeatSplit

HEATSPLIT

MULTI-ZONE HEATING

Looking to heat other areas in your home?

Valor's HeatSplit (1270RBK) provides distribution of heat, redirecting HeatShift heat to other areas of your home such as bedrooms, hallways or utility rooms.

Multi-zone heating targets specific areas that you frequent the most—where you want it, when you want.

The HeatSplit fan connects directly to both 38" and 48" front wall plenums, moving heat to separate spaces for multi-zone heat management in the home.

Zone heating with Valor HeatSplit delivers the perfect blend of radiant and convective warmth while being more economical and efficient.

Valor 10 Remote

Child Proof your remote
for safety and ease.

Accurately knows the current
temperature of your room.

Set the timer to turn the fireplace
off up to 9 hours ahead.

Set the temperature for
specific times of the day.

Program your fireplace to turn
on and off when you want at
the temperature you want.

The Remote Battery and Wall Switch
kit comes standard with all Valor 10
remotes. The kit lets you control your
fireplace and gives you easy access to
your fireplace's receiver batteries.

Standard with the H5 and H6, the Valor 10 interactive remote control has up-to-the-moment information on the state of your fireplace—such as temperature and other customizable settings.

LEARN MORE
ABOUT OUR REMOTE
AND APP:

APP

TAKE COMPLETE CONTROL

Increase or decrease flame height to find the perfect ambiance. Use the color wheel to find the ideal temperature setting.

CONTROL FEATURES

If you have a fan, set the speed of the fan from low to high.

In the H6, you can adjust the fireplace's lighting too.

PROGRAM ON THE GO

Program days, times and temperature settings to match your lifestyle.

Set a countdown timer so your fireplace shuts off automatically.

SAVE ON ENERGY COSTS

Save energy while enjoying a changing, realistic flame with ECO mode.

Choose time and the percentage of energy saved is shown in the circle/leaf.

The Valor 10 remote pairs with the Valor 10 App so you can control your fireplace with your smartphone. Do everything you can do with your Valor 10 remote—and more—with our Valor 10 app.

EFFICIENCY RATINGS

While the North American fireplace industry is largely self-regulated, at Valor we use recognized Canadian and US government testing methods to determine our energy efficiencies, and ensure our products perform in your home as rated. All our fireplaces are available as natural gas or propane.

SECONDARY HEAT EXCHANGER

The built-in Secondary Heat Exchanger naturally improves convective heat—removing the need for a fan. Your fire will heat up fast for immediate comfort—and with no need for electricity, you'll save money. To find out more, visit valorfireplaces.com/efficiency
