PORTRAIT + P2 GAS FIREPLACES

**COMPACT DESIGN.
UNCOMPROMISING PERFORMANCE.**

valor[®]
FIREPLACES

What makes a Valor?

Feel the heat.

All our gas fireplace radiate heat. Like feeling the sun on your skin. The best kind of heat there is.

Improving heat.

Valor gas fireplaces circulate warm air through natural convection. Our exclusive Secondary Heat Exchanger and aerodynamic firebox naturally improves convective heat—without a noisy fan.

Safety.

We put our fires through rigorous safety testing in our in-house CSA approved lab. We provide a screen with every fireplace to keep you and your loved ones safe.

Efficiency.

Valor fireplaces are heater-rated so we put radiant heat technology into every fire. Our zone heating is up to 25% more efficient than central forced air systems.

Logs provide heat.

High definition, low mass fiber ceramic logs and coals heat up and glow quickly. We harness the radiating heat from our logs, just like real thing.

Longer-lasting.

Our precision stainless steel burners don't rust, and create an enhanced flame and ember glow that produces radiant heat.

No power?

No problem. All Valor gas fireplaces run on 4 AA batteries as the primary source of power—not as back-up power like other brands. You'll save money on your electrical bill.

Outdoor-friendly.

Valor gas fireplaces are rated for outdoors under a covered patio and use quality materials that exceed the requirements for outdoor use.

Design your own.

Visit the Valor Fireplace Design Center to design your very own Valor Fireplace today.

Portrait

Reduced height allows the Portrait to better fit into smaller spaces.

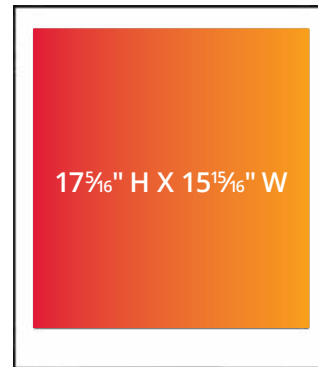

Four classic styles of historic design, plus three contemporary.

Quietly circulates warm air through natural convection, eliminating the need for a noisy blower—and saving you money.

Two engine styles—a Zero Clearance engine, for new fireplaces; and an insert-specific engine, perfect for replacing existing wood-burning or gas fireplaces.

The Valor Plus remote comes standard with the Portrait.

P2

Still compact but slightly taller with a larger viewing area.

Four contemporary styles, and a new classic front, the Richmond.

Optional HeatShift, keeping your wall finishes, artwork or TV above the P2 safer.

Works as an insert with the optional Reduced Depth 3-sided backing plate.

The Valor 10 remote comes standard with the P2, providing access to Valor's WiFi app.

HEATSHIFT LDK12 + LDK13

Find out
more:

KEEPS WALL COOLER

Pioneered by Valor, our unique HeatShift System® naturally circulates up to 125 cubic feet of convective heat per minute through hidden ducts and back into the room—avoiding surface areas above the fireplace.

DESIGN FLEXIBILITY

Run standard finishing materials right up to the fireplace surround,

including drywall, wood, tile and stone. Install mantels lower than usual at a one-to-one ratio of depth to height from the fireplace surround.

IMPROVES PERFORMANCE

Harnessing convective warmth, up to 60% of fireplace heat rises and flows through HeatShift and back into the room. The remaining heat radiates from the fireplace, keeping you warm.

NO ELECTRICITY REQUIRED

HeatShift circulates heat naturally using gravity and Valor product ingenuity—no need for a fan or electricity. No power—no problem.

CONSTRUCTION MADE EASY

Unlike many competing products, Valor fully ducts HeatShift for clean, safe air quality. HeatShift is built and designed in North America for North American homes, meeting building code requirements.

PORTRAIT INSERT (IN)

An optional arched backing plate is available for the Windsor Arch insert fronts. Inserts can be converted to ZC.**

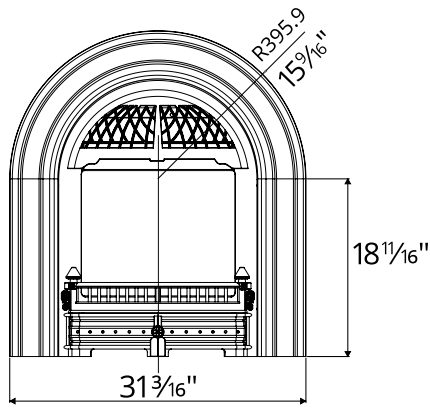

The President and Senator insert fronts have recommended closure plates. (President plate not shown).

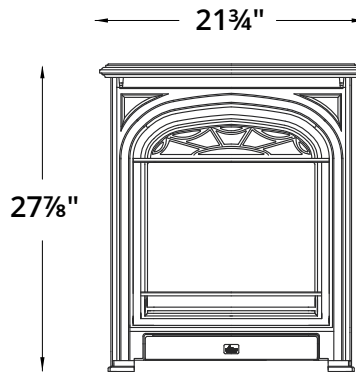

The Clearview and Ledgeview Insert fronts include backing plates. See below:

ENGINE OPTIONS:

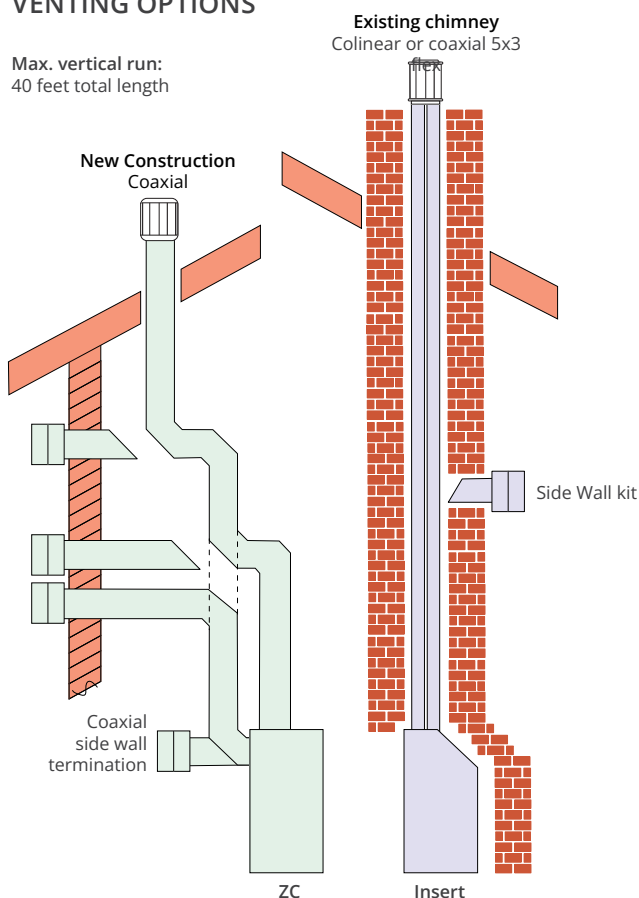

ZERO CLEARANCE 530VN/530VP

- Coaxial venting ideal for built-in ZC applications.
- Slim engine depth.
- Direct vent coaxial system convertible to colinear for insert applications.
- Engine can be either top or rear vented.
- Improved window latch for ease of service.

VENTING OPTIONS

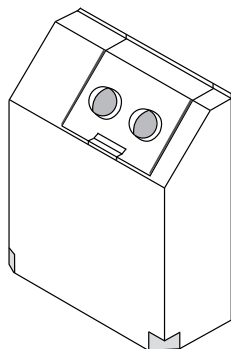

Max. vertical run:
40 feet total length

INSERT

530VNI/530VPI

- Colinear vent collar plate ideal for inserting into existing solid fuel fireplaces.
- Sloped fire box venting and slim design for fitting difficult chimney cavities.
- Adaptable direct vent coaxial flex venting.
- Removable sloped venting collar for ease of install.
- Improved window latch for ease of service.
